4.10. The contribution received from the ICN distribution will belong to ImpalaCoin and will be used exclusively for the development and running of the Project, as defined above.

5. RISKS

5.1. You understand that Digital Assets, ICNToken, blockchain technology, Stellar, XLM and other associated and related technologies are new and untested and outside of ImpalaCoin's exclusive control and adverse changes in market forces or the technology, broadly construed, may prejudice or halt ImpalaCoin's performance under these Terms and in such event ImpalaCoin will not be responsible for the non-performance.

5.2. In addition to the above, you also acknowledge that you have been warned of the following risks, associated with the Website, Digital Assets, ICN, the BANK and other relevant technologies mentioned herein:

(a) Legal risks regarding securities regulations

There is a risk that in some jurisdictions the ICN and other Digital Assets may be considered to be a security, or that it may be considered to be a security in the future due to subsequent changes in relevant laws.

ImpalaCoin does not give warranties or guarantees that ICN is not a security in all jurisdictions. Each user of ICN shall bear its own legal or financial consequences of ICN ImpalaCoin considered a security in their respective jurisdiction. Every user is bound to check if acquisition and disposition of ICN is legal in its jurisdiction, and by accepting these Terms each user undertakes not to use ICN should their use not be legal in the relevant jurisdiction. If a user has any question that the use of ICNToken under these Terms is not legal in his/her/its jurisdiction, that user should not use the ICN, not acquire them and should immediately stop using or possessing them if such case arises. Acquiring cryptographic tokens in possession and exchanging them for other cryptographic tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of ImpalaCoin to provide ICN coins and the

BANK in some jurisdictions may be restricted or eliminated by future regulation or legal actions. In the event, it turns out with a high degree of certainty that ICN are not legal in certain jurisdiction, ImpalaCoin will either a) cease operations in that jurisdiction, or b) adjust ICN and the BANK in a way to comply with the regulation should that be possible and viable.

(b) Risks associated with Stellar

ICN are based on Stellar blockchain. As such, any malfunction, unintended function or unexpected functioning of the Stellar protocol may cause the ICN to malfunction or function in an unexpected or unintended manner. XLM, the native unit of account of the Stellar may itself lose value in ways similar to ICN, and also other ways. More information about the Stellaris available at [http:// www.stellar.org](http://www.stellar.org).

(c) Risk of unfavorable regulatory action in one or more jurisdictions

Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Stellar network and associated blockchain networks and Digital Assets and ICN could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital tokens like ICN, which could impede or limit their existence, permissibility of their use and possession, and their value.

(d) Risk of theft and hacking

Hackers or other groups or organizations may attempt to interfere with your Third-party Wallet, the Website or the availability of ICN and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks.

(e) Risk of security weaknesses in the Website and ICN source code or any associated software and/or infrastructure

There is a risk that the Website and ICN may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of ICN.

(f) Risk of weaknesses or exploitable breakthroughs in the field of cryptography

Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Stellar, ICN, the BANK, which could result in the theft or loss of ICN.

(g) Risk of mining attacks

As with other decentralized cryptocurrencies, Stellar blockchain, which is used for the ICN, is susceptible to attacks, including but not limited to double-spend attacks and race condition attacks. Any successful attacks present a risk to the ICN, expected proper execution and sequencing of ICN, and expected proper execution and sequencing of Stellar contract computations in general. Despite the efforts of ImpalaCoin and Stellar Foundation, the risk of known or hacking attacks exists. Hack & Mining Attacks, as described above, may also target other blockchain networks, with which the ICN may interact with and consequently the ICN may be impacted also in that way to the extent, described above.

(h) Risk of loss of value

ICN have no intrinsic value, and its exchange value may fluctuate and their users might suffer loss in value of such acquired coins. There might be different reasons that would cause unfavourable fluctuations of the value of the ICN.

(i) Risk of uninsured losses ICN are entirely uninsured, unlike bank accounts or accounts at some other financial institutions.

(j) Risk of malfunction in the Stellar network or any other blockchain

It is possible that the Stellar network or any other network, to which the ICN are interacting with, malfunctions in an unfavourable way, including but not limited to one that results in the loss of ICN.

(k) Internet transmission risk

You acknowledge that there are risks associated with using the ICN including, but not limited to, the failure of hardware, software, and Internet connections. You acknowledge that ImpalaCoin shall not be

responsible for any communication failures, disruptions, errors, distortions or delays you may experience when using the Website and ICN, howsoever caused. However Since we are constantly monitoring we shall endeavor to the best of our abilities to keep you informed.

(l) Unanticipated risks

Cryptocurrencies and blockchains are new and untested technologies. In addition to the risks set forth here, there are risks that ImpalaCoin cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

(m) Insufficient interest in ImpalaCoin, the BANK and ICN

It is possible that ICN or BANK will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the price level of ICN

(n) ICN and the BANK, as developed, may not meet your expectations

The BANK through complete modules and apps may undergo significant changes as we evolve. Your expectations regarding the form and functionality of the BANK and ICN may not be met upon release of new upgrades, speed of deployment or uptake of the BANK, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of ICN.

(o) The BANK may never be Global The BANK, described in section 2, may never attain true global status even though ImpalaCoin will deploy tireless effort and resources to attain that mission.

(p) Risks related to partnering projects

ImpalaCoin is partnering with a number of financial institutions , mobile operators to integrate their solutions and technology into the Superhub interoperable platform especially in regards to agents Mpos systems to create the largest blockchain Mpos network that will be key in bringing crypto payments to mass markets (in addition to Stellar). Unexpected

negative events, such as slower development, permissions, technological issues and challenges, bugs may occur within such projects and consequently ImpalaCoin may not be able to meet its undertakings, or will meet its goals at our aggressive timelines. Even though ImpalaCoin believes in the quality of its partners and will undertake all reasonably expected and possible actions to mitigate and prevent such risks, ImpalaCoin cannot be held liable for any events arising out of its partners misrepresentation, lack of ability to deliver or change of their development plans.

(q) Investment Risk

Financial and operating risks confronting altcoins are significant and ImpalaCoin is no exception. The startup altcoin market in which ImpalaCoin will compete is highly competitive and the percentage of companies that survive and prosper is small. Alt coin startups often experience unexpected problems in the areas of product development, marketing, financing, and general management, among others, which frequently cannot be solved. In addition, startups may require substantial amounts of financing, which may not be available through institutional private placements, the public markets, ICO or otherwise.

(r) Tax Risk

The tax characterization of the ICN is uncertain, and each user must seek its own tax advice in connection with an acquisition of the ICN. An acquisition of the ICN pursuant thereto may result in adverse tax consequences to Investors, including income taxes and tax reporting requirements. Each user should consult with and must rely upon the advice of its own professional tax advisors.

(s) Regulatory Risk Associated with the Project

Regulation of alt coins/ tokens (including the ICN) and coin offerings such as this, cryptocurrencies, blockchain technologies, and cryptocurrency exchanges currently is at embryonic stage and likely to rapidly evolve, varies significantly among international, national and local jurisdictions and is subject to significant uncertainty. The regulation of non-currency use of blockchain assets is also uncertain. The United States Commodity and Futures Trade Commission has publicly taken the

position that certain blockchain assets are commodities, and the United States Securities Exchange Commission has issued a public report stating federal securities laws require treating some blockchain assets as securities, and Blockchain networks also face an uncertain regulatory landscape in many foreign jurisdictions such as the European Union, Taiwan, China and Russia. The Project intends to establish the BANK for the trading, listing and underwriting non- currency blockchain tokens and may in the future be treated as a commodity and future exchange and/or securities exchange by the regulatory authorities in one or more jurisdictions, and in such case, the operation of the ICN may be disrupted, hindered or restricted by regulatory orders to apply for registration or becoming licensed as an exchange before the ICN can continue operation as originally planned.

5.3. The ICN and the BANK are provided “as is”. ImpalaCoin and its affiliates and licensors make no representations or warranties of any kind, whether express, implied, statutory or otherwise regarding the ICN, including any warranty that the ICN will be uninterrupted, error free or free of harmful components, secure or not otherwise lost or damaged. Except to the extent prohibited by law, we and our affiliates and licensors disclaim all warranties, including any implied warranties of merchantability, satisfactory quality, fitness for a particular purpose, non-infringement, or quiet enjoyment, and any warranties arising out of any course of dealing or usage of trade.

ImpalaCoin consequently explicitly prohibits persons from paragraph 6.1 from using the ICN.

ImpalaCoin shall not be held liable for any legal or monetary consequence arising of such use.
